

Carbon Reduction plan

Supplier name: DotEcon Ltd

Publication Date: 9 October 2026

Commitment to achieving net zero

DotEcon Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

This year:	Financial year 2025-26 (August to July)
Last year:	Financial year 2024-25 (August to July)
Baseline year:	Financial year 2023-24 (August to July)
Additional details relating to the Baseline emissions calculations.	
This year emissions	
Scope 1	0 (zero) DotEcon does not use gas at its offices.
Scope 2	0 (zero) Electricity based on electricity usage at DotEcon's offices. DotEcon uses serviced offices where electricity is included in the lease. We do not have separate bills or numbers for electricity used. All used electricity comes from 100% renewable sources.
Scope 3	- Upstream transportation and distribution: 0 (zero) As an administration-based consulting and research business, we do not purchase or sell any goods. - Waste generated in operations: 0 (zero) Mixed waste recycling at all offices. - Business travel (air): 0 There was no air travel in this financial year. Business travel (train): 0 While there was some business train travel, it occurred in Germany and Austria, where all trains are fully electrified. - Business travel (hotel): 0.1 - Downstream transportation and distribution: 0 (zero) As an administration-based consulting and

	research business, we do not purchase or sell any goods. 6. Employees commuting: 3.4 7. Employees working from home, gas and electricity: 2.8
Total Emissions	6.26 tCO _{2e}

Emissions reduction targets

DotEcon achieved a reduction of 56.82 %, from 14.50 tCO_{2e} in the previous financial year to 6.26 tCO_{2e} in the last financial.

This substantial reduction has been achieved mainly because there has been no business air travel in the financial year and DotEcon using serviced offices where electricity is generated from 100% renewable sources. There has been no change in employee commuting and working from home emissions.

To continue our progress to achieving Net Zero, we will continue to

- promote flexible working practices to reduce commuting.
- encourage interaction with clients, especially those outside of the UK, by electronic means wherever feasible to reduce travel needs.
- promote environmental awareness, policies and initiatives through our business.

We project that carbon emissions will be in the region of 10 tCO_{2e} over the next five years. This is because in spite of our efforts to encourage client interaction by electronic means, some air travel may become necessary in the course of our work.

Declaration and sign off

This carbon reduction plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.²
